

PRODUCT INFORMATION

GEO ULTRA

Valvoline GEO Ultra has been specially formulated with selected premium quality base stocks and superior additive components to provide outstanding lubrication of engines running on Compressed Natural Gas (CNG) for vehicular applications. The ash content of the oil is minimized to reduce formation of 'hot-spots' that can lead to increased No_x formation.

Valvoline GEO Ultra provides high resistant to thermal and oxidation giving less deposit and varnish. Engine keep clean and last long. It also ensures excellent control on engine wear, deposits and enhanced protection to slider follower of valve train mechanism. Recommended for use in CNG engines of all makes for vehicular applications such as urban buses & trucks, delivery vans & other service fleets.

GEO ULTRA ADVANTAGES

- Low ash
- Excellent oxidation / nitration control.
- Reduced No_x formation
- Enhanced protection to slider follower of valve train mechanism.
- Excellent deposit and wear control.
- Good scuff protection.
- Capability of extended oil drains.

PERFORMANCE LEVEL

API CF

CUMMINS CES 20074

Typical properties:

Typical Properties characteristics are based on current production. Whilst future will confirm to Valvoline specification, variations in these characteristics may occur.

Typical Characteristics		
SAE Grade		15W-40
Density @ 15°C g/cm ³	ASTM D4052	0.8645
Kinematic Viscosity @ 40 °C cSt	ASTM D445	108.4
Kinematic Viscosity @ 100 °C cSt	ASTM D445	14.35
Viscosity Index	ASTM D2270	139
Total Base Number mg KOH/g	ASTM D2896	6.25
Flash Point, COC °C	ASTM D92	234
Pour Point °C	ASTM D97	-42
CCS @ -20 °C mPas	ASTM D5293	6020

This product is not likely to present any significant health or safety hazards when properly used in recommended application and good standards of personal hygiene are maintained. Reference is made to Safety Data Sheet (SDS) which is available on request via your local technical or sales representative.
